

Shaun Sproston | Junior Web Developer

Location: **Stoke-on-Trent**

Telephone: **07747 568384**

Email: **shaunsproston@yahoo.co.uk**

Profile

I am an ambitious Junior Web Developer, with a DipHE in Interactive Multimedia from Staffordshire University. I have knowledge of the latest web development techniques, and modern frameworks and technologies. I am looking to start my career as a developer. During a multitude of courses, I have developed a keen eye for detail, along with fundamental knowledge for programming practices.

I'm continuing to develop my skillset, working towards becoming a full stack engineer. I am looking to start in a role within a challenging environment, where I can hopefully become an asset to the business, and ultimately further my knowledge in becoming a better software developer.

Core Skills

Development

- HTML5 / CSS3
- JavaScript (ES6 +)
- Developing Front End Web Apps
- Convert PSD and Wireframes to HTML
- Git
- JSON
- Responsive layouts
- React (currently learning)
- PHP (currently learning)

Software

- VS Code / Atom
- Github
- Netlify
- Microsoft Office Suite

Education / Training

JavaScript Bootcamp - Udemy

Jan 2019 to May 2019

Diploma of Higher Education - Staffordshire University

2001 to 2003

Modules included :- Software Development / Web Page Scripting / Object – Orientated Methods

Freelance Experience & Projects

Monika's Massage Website

Created for client using HTML, CSS and some simple jQuery slide effects. Uploaded to my Github, hosted on Netlify.

Calculator App

Designed from scratch using vanilla JavaScript, has all the functionality of a regular calculator.

Pong Game

Created following a tutorial, first experience of writing a pure, functional program, without using hardcoded values.

Shaun Sproston Portfolio Site

My site created from scratch using a parallax design, combined with some CSS animation effects, to showcase my work.
- *Not yet hosted as still under construction.*

Ravenous React App

Created using React, Node JS whilst integrating the Yelp API to update results dynamically.
- *Main project in the Codecademy Web Development course.*

Random Color Generator

One of my first projects, using Math.random function, concatenated into hex code to produce random colours.
